EDUCATION

Virginia Tech

BTech Computer Science- Adv. DSA, Combinatorics, Statistics, Comp.Organization II

Blacksbrug, VA

Aug. 2023 – Dec 2026

EXPERIENCE

Full Stack Developer - Intern

May 2025 – Aug 2025

CIPIO.ai

Fairfax, VA

- Built AI Reply Service integrating Groove webhooks, Gemini, and Supabase, reducing manual drafting time 98%.
- Automated 100% of manual follow-ups by deploying a scheduled email service with SendGrid using CRON.
- Shipped Next.js dashboard for drafts/follow-ups; boosted agent throughput 10 ×, reduced errors 24%.
- Enabled 50+ concurrent replies, <100ms DB ops through indexing, async queues and retries.

Software Engineering Intern

May 2024 – July 2024

Krossmark Innovations - Embee group

India, GJ

- Built an online machine inventory system with a team of 5, improving record efficiency by 15% overall.
- Added CRUD features for bill of materials using Python (SQL) and React, cutting task time by 25%.
- Responsible for post-launch debugging and updates, improving system performance by an additional 10% .

Project Management Intern (Campus InternEXP)

Aug 2024 – Dec 2024

Commonwealth Cyber Initiative, Southwest Virginia

Blacksburg, VA

- Contributed to the development of programs, including workforce development,innovation, and research initiatives.
- Assisted in event planning and logistics for seminars and for an annual meeting involving over 40 researchers presenting their research as well as having attended Commonwealth Cyber Initiative's annual events.
- Updated the entire CCI SWVA website Using Ensemble (CMS) including reviewing the website for accuracy, creating content and checking website's accessibility.

Undergraduate Grading Assistant

Aug 2024 – Dec 2024

Virginia Tech Department of Engineering

Blacksburg, VA

- Provided grading support to over 140 students in ENGE 1215, ensuring fair assessment and constructive feedback.

Research and Development Intern

May 2024 – Sept 2024

MachWorks @ Virginia Tech

Blacksburg, VA

- Prototyped a supersonic AI-powered UAV, validated designs with MATLAB simulations and performance analysis.
- Created CAD models and documentation and cut delays by 25% and improved team efficiency by 30%.

PROJECTS

Google keep app Clone | TypeScript, JavaScript, HTML5, React, CSS, UI/UX

Aug 2024

- Made a note-taking web application, replicating key features of Google Keep.
- Used React's component-based architecture, reducing code complexity by 40% for better maintainability.
- Implemented TypeScript for type safety, reducing runtime errors by 15%.

AI Assistant device | Python, ChatGPT, AI, Google text2speech API, RaspberryPi, Git

Jan 2024 – May 2024

- Developed a compact AI device with Python, Raspberry Pi, and ChatGPT integration.
- Integrated Google Text-to-Speech API for real-time information retrieval from captured images.
- Enhanced device functionality by 10% through software optimizations and updates.
- Achieved 95% accuracy in speech synthesis, improving user interaction and experience.

Management Systems | Python, MySQL, HTML5

Dec 2023

- Developed efficient systems for student data, enrollments, fees, library, appointments, records, and billing.
- Designed user-friendly HTML5 interfaces, reducing patient wait times and administrative task time.

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL

Frameworks/Stack: JavaScript, TypeScript, HTML/CSS, React, Node.js, SpringBoot, Supabase

Developer Tools: Git, Docker, Twilio, VS Code, Eclipse, Cursor

Certifications: Python basics for data Science by IBM, Relational Databases and SQL by StanfordOnline.
